

## Quick guide: Student Summary View

These quick guides are based on the "simulation environment". Things may work somewhat differently in the production environment. These "quick guides" are produced quickly with little attention to formatting and fitting everything on a letter size page for printing. More elaborate guides will be made available at a later point. These guides are meant to get you started -- following an introductory hands-on session. Or, for the more adventurous, to guide self-study.

Maximum number of rows to return (up to 300):

Empl ID:

National ID:

Last Name:  Hunter

First Name:  Student1

☐ Case Sensitive

[Basic Search](#) [Save Search Criteria](#)

This is a fake student with the last name of "Hunter" and the first name of "Student1". Enter actual name of student or ID (if available).

What comes up is a ton of information and there are some concerns that it may be too much or that access to the item will have to be severely restricted -- all under discussion. If you have access and use a real student's name, be aware of your professional obligations and keep the FERPA regulations in mind.
