Edit Service Indicators
Service Indicators provide or limit an individual's access to college or school services.

Positive service indicators indicate special services to be provided. Negative service indicators are equivalent to holds.

Modify Service Indicators to update fields as needed. Service Indicators may be changed to take effect and expire on different dates.

When assigned to an advisee, the negative or positive service indicator icons display on every page in CUNYfirst that displays student data.

Note: Only the office or department that placed the service indicator may edit that service indicator.

Note: Parts of images may be obscured for security reasons.
