

Apple

In order to use the Labstats Application you will need to have the **Remote Desktop 8** downloaded to your device.

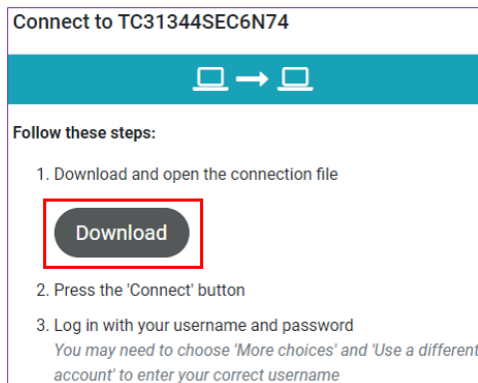

1. To download the Remote Desktop, go to the **Apps store**, on the table, search for Remote Desktop 8, and click **Download**.

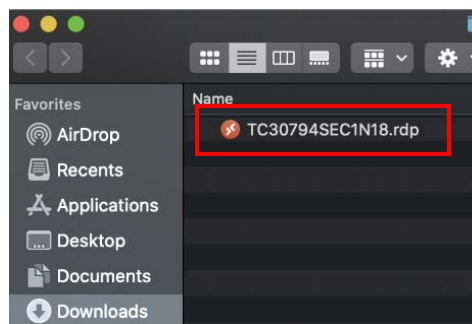

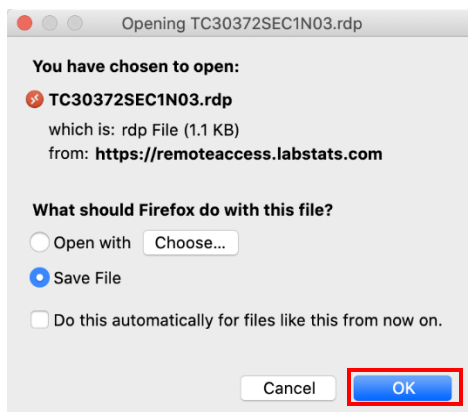

2. **To access Labstats**

Link: <https://remoteaccess.labstats.com/City-College-of-New-York>

3. Under the **Computer Labs** column, select the lab section you will like to connect to, and click **Connect** next to the computer. Click **Download**.

4. You will then get this prompt, if you do not see a prompt, you will have to go to your Downloads Folder, click on the **.rdp** file

Downloads Folder

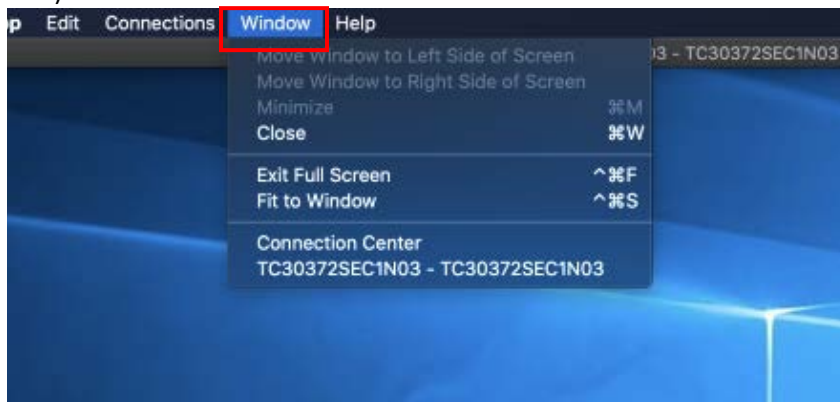

- The log in page will pop up. Enter Citymail username and password. Click **Continue**

Note: username itcs\jdoe000)

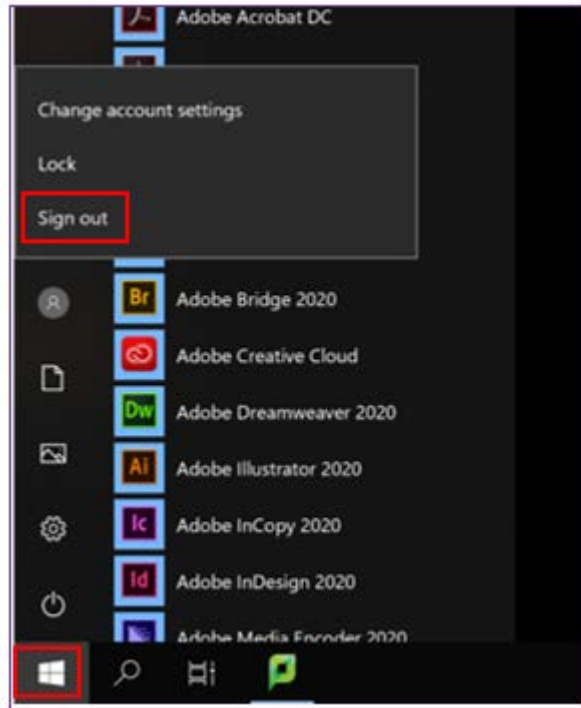

- Once you put your username and password, you will receive the following certificate click **Continue**.

- Once logged into the remote computer, you will notice that your screen might be out of proportion. This can be fixed by clicking on the window and the fit to window. This will not be visible unless you move your mouse to the top of the screen of the computer you have remotely connected to).

- When finished with the session, click on the **Start menu** (on the remote computer)

- Click on your avatar followed by the **Sign Out** option. This will sign you out from the remoted computer.
DO NOT click Shut Down, or Restart it will not allow for users to access this workstation.
