

## iPad

In order to use the Labstats Application you will need to have the **Remote Desktop 8** downloaded to your device.

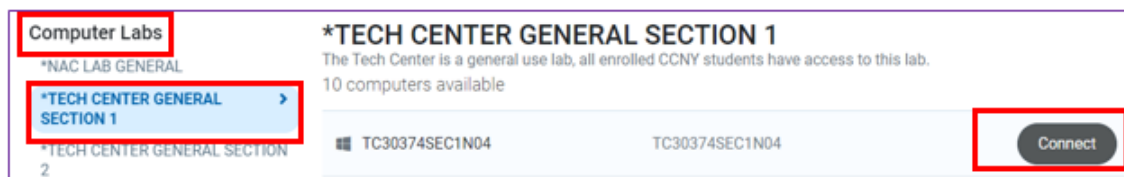

1. To download the Remote Desktop, go to the **Apps store**, on the table, search for Remote Desktop 8, and click **Get**.

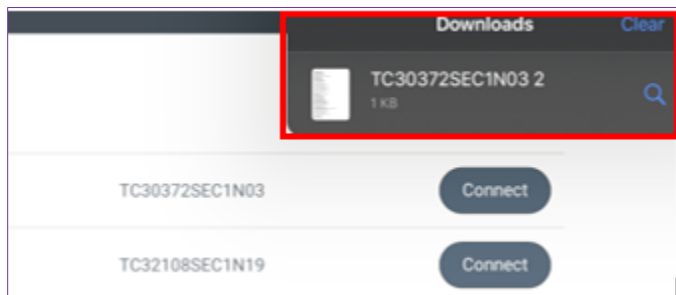

2. **To access Labstats**

Link: <https://remoteaccess.labstats.com/City-College-of-New-York>

3. Under the **Computer Labs** column, select the lab section you will like to connect to, and click **Connect** next to the computer. Click **Download and Open in**.

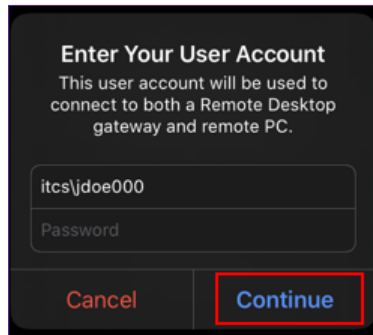

4. Click the file to **Download** and open.

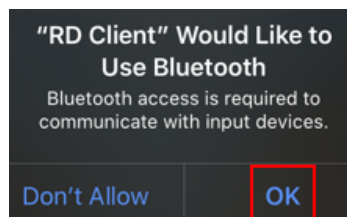

5. Enter Citymail email credentials click **Continue**

*Note: Please note you need to use itcs\[username] for the username. (Ex: itcs\jdoe000)*

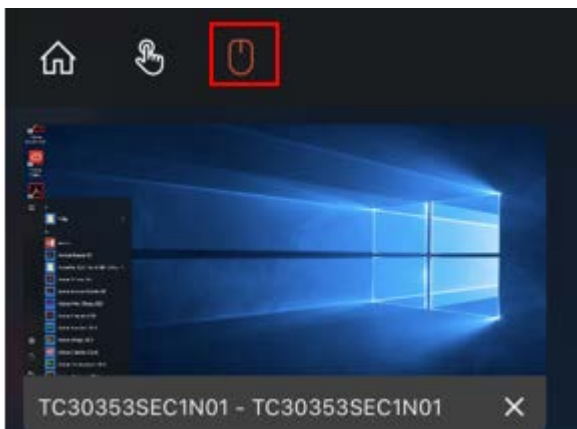

6. You may get this pop up if you are using any Bluetooth devices (Ex: Bluetooth keyboard). If you are using any Bluetooth devices, click **OK**.

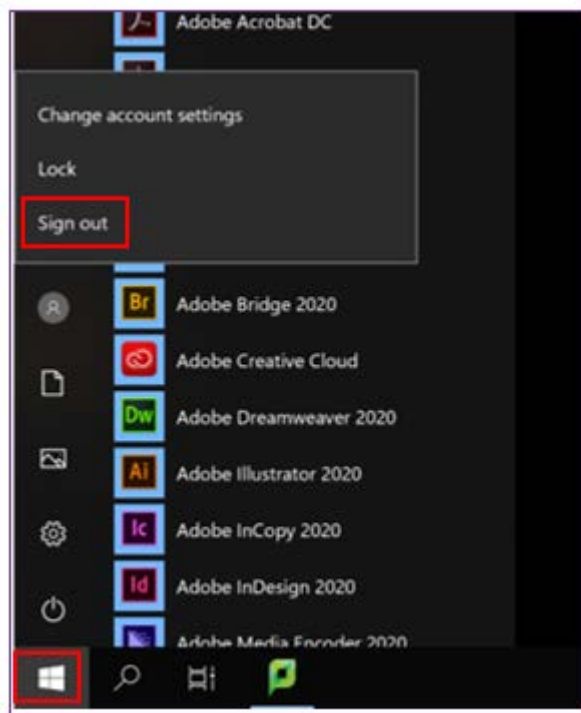

7. On the desktop screen, you will see three icons... click the middle icon.

8. On the following screen, click on the **Mouse Icon**. This will turn your iPad screen into a mouse pointer. You will still use your finger touch on your iPad, but the click will be more like a regular mouse. The pointer and your finger might not be synced, but if you use the finger pointer, it will be much more lagged, and will not click correctly like a mouse.

9. When finished with the session, click on the **Start menu** (on the remote computer)

10. Click on your avatar followed by the **Sign Out** option. This will sign you out from the remoted computer.  
**DO NOT** click Shut Down, or Restart it will not allow for users to access this workstation.
